

WHY BIOGAS?

- Savings in waste management costs (smaller gate fees).
- Switch from an energy consumer to an energy producer.
- Added value as a green business (less CO2 emission).

Industry

There is a wide spectrum of applications in the industry. Industrial waste and biomass can be found and processed in the following sectors:

Food processing: from breweries, distilleries, meat & fish and fruit & vegetables to the baking and sugar industries.

Food disposal: from hotels, restaurants and supermarkets to cosmetic manufactures and other industrial processing plants.

Wastewater: utility companies, municipalities and cities.

The Combigas concept and technology can help you:

- boost both the public and the private economy by meeting energy requirements,
- sell surplus energy, and last, but not least,
- achieve a greener profile.
